APPENDIX A

- 1. (Amended) A method for treating septic shock in a subject comprising administering to the subject an effective amount of an agent which binds G protein, to thereby inhibit the interaction of said G protein and CD14, such that septic shock in the subject is treated.
 - 2. The method of claim 1, wherein the agent binds $G\alpha$ subunit.
 - 3. The method of claim 1, wherein the agent is a cell permeable agent.
 - 4. The method of claim 3, wherein the agent is a peptide.
- 5. The method of claim 4, wherein the peptide is mastoparan or an analog thereof.
 - 6. The method of claim 1, wherein the septic shock is endotoxic shock.
- 7. The method of claim 6, wherein the endotoxic shock is induced by gram negative bacteria.
- 8. The method of claim 1, wherein the endotoxic shock is induced by gram positive bacteria.
 - 9. The method of claim 1, wherein the septic shock is LPS-induced shock.
- 10. The method of claim 1, further comprising administering an antibiotic to the subject.
